PRESS RELEASE

Streamwide and Airbus successfully achieve a key step in securing 4G/5G Mission Critical Communications.

Paris – On 2 February 2022, STREAMWIDE and Airbus have successfully demonstrated the interoperability of the STREAMWIDE MCX (Mission Critical Services) client software for smartphones with Airbus KMS (Key Management System) server. This milestone is a key step in delivering secure solutions based on 3GPP standards to customers in the scope of critical communications.

With the incorporation of the KMS server to the **Tactilon Agnet** product solution, Airbus is committed to improve and secure the communications of governmental agencies and enterprises on their day-to-day operations by providing interoperable up to date technologies for critical services such as voice, video, messaging, geolocation, and custom applications.

The KMS is an element of the 3GPP specification for MCX Critical Communication, and it is the central point to generate the security key material to both the smartphone client and the Group Management Server (GMS) on the MCX server side. This is the foundation of the security and end-to-end encryption of group communications for all organizations relying on secure and reliable critical communication solutions.

The common integration of the solutions from STREAMWIDE and Airbus is demonstrating the ability of both companies to design, integrate and deliver to the market technologies aligned with the 3GPP standards which for both companies is the foundation and commitment to support customers on the long term with proven and standardized technologies.

This achievement is also re-enforcing the long-term partnership already established between STREAMWIDE and Airbus with the intention to lead the critical communications market.

PRESS RELEASE

About STREAMWIDE (Euronext Growth: ALSTW)

A major player for 20 years in the critical communications market, STREAMWIDE has successfully developed its **Team on mission** (mission critical) and **Team on the run** (business critical) software solutions for administrations and businesses. These solutions for smartphones and PCs, offered in a SaaS model or on Premise, benefit from numerous functionalities such as the multimedia group discussions, VoIP, push-to-talk (MCPTT and MCx new generation 4G / 5G LTE), geolocation, digitization and automation of business processes. These innovative solutions meet the growing needs for digital transformation and real-time coordination of interventions. They allow field teams to transform individual contributions into collective successes and to act as one in the most demanding professional environments.

STREAMWIDE is also present on the Value-Added Services software market for telecom operators (visual voice messaging, billing and charging of calls in real time, interactive voice servers, applications and announcements) with more than 130 million end users all over the world.

Based in France and present in Europe, USA, Asia and Africa, STREAMWIDE is listed on Euronext Growth (Paris) – ALSTW FR0010528059.
