

## Threats are diverse and sometimes unpredictable.

Involving collaborators and equipping them with reliable tools to alert instantly, qualify the incident and act with confidence are key factors to effectively manage a crisis.

# Team on the run, the most secure solution to have at hand!

**Empower your employees with the best means to effectively manage a crisis situation.**

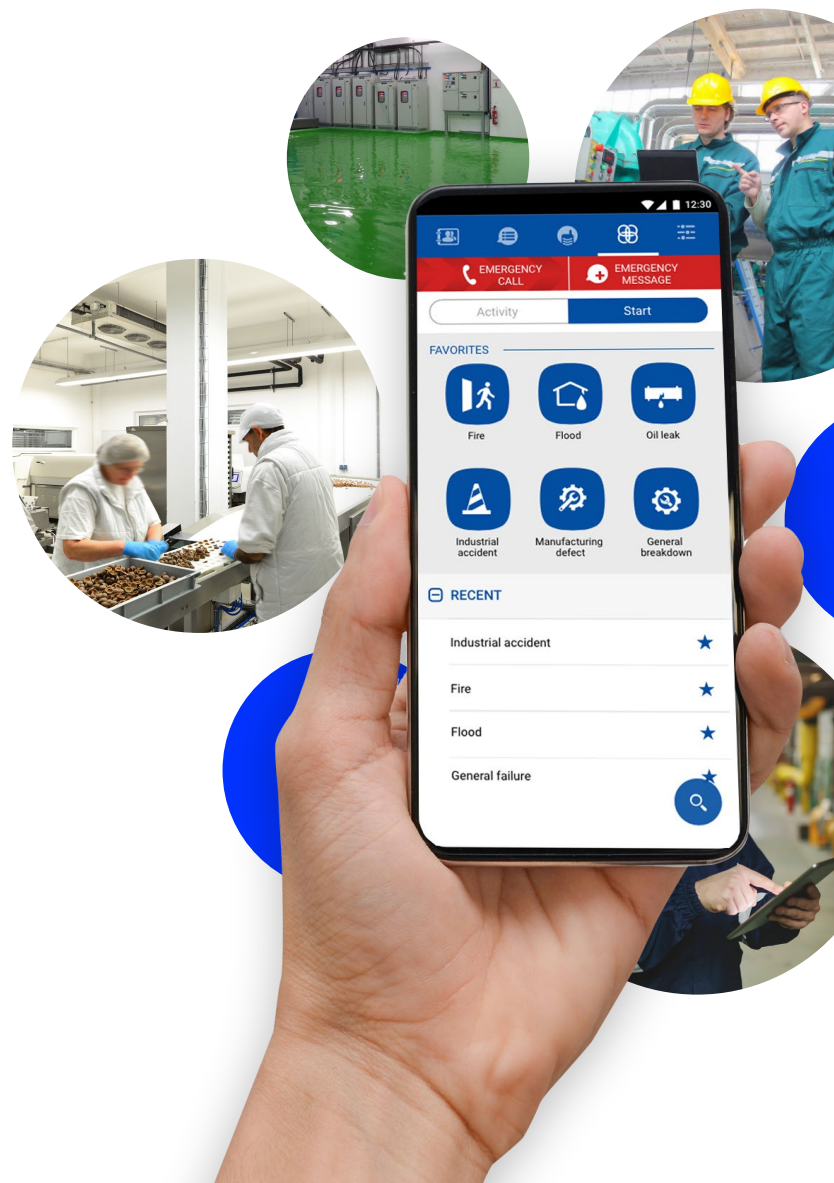

Your teams can instantly access the digital crisis toolkit and automated processes from any device (smartphone, PC or tablet), both offline and online, to quickly report any incident. **Team on the run** allows you to control the information transmission circuit and to be in control of the situation during all phases of the crisis.

**Communicate and coordinate your actions in real time.**

Exchange sensitive information via a secure and reliable business platform - message broadcasting, instant multimedia chat, audio/video conferencing, on-call management, etc.

**Protect your employees on the go.**

The geolocation alert system allows you to be notified in real time when an employee is in distress so you can intervene quickly.
