Nearby Computing & STREAMWIDE Partner to Redefine Mission-Critical Communications Deployment with Edge Automation platform.

BARCELONA, Spain – January 24, 2024 – Nearby Computing, the leading platform for Edge Computing Orchestration and Automation, and STREAMWIDE, a prominent communications software technology provider specializing in mission-critical communications and operations solutions, have entered into a strategic partnership aimed at automating and orchestrating STREAMWIDE's All-in-One lifecycle applications through the innovative NearbyOne platform.

Deploying STREAMWIDE app: **team on mission (TOM)** the leading mission-critical communications solution with the industry-leader platform for Edge Computing Orchestration and automation, NearbyOne, significantly reduces entry barriers, operational complexities, and associated deployment costs. As a result, applications can be deployed with unparalleled ease, speed, and cost-effectiveness.

Concretely two main benefits are twofold deploying STREAMWIDE applications in conjunction with NearbyOne: Firstly, the utilization of a single instance of NearbyOne infrastructure allows for the efficient operation over multiple streams, leading to evident cost optimization. Secondly, the deployment process has been significantly improved, reducing installation time from an average of around 15 days to just 1 day. These enhancements reflect our commitment to streamlining operations and maximizing efficiency. Both companies will showcase a demo of this deployment at MWC24.

The burgeoning interest and adoption of edge computing across various industries, coupled with the maturation of enabling technologies, underscore the importance of this strategic alliance. Infrastructure and operations leaders are urged to collaborate closely with their lines of business to embrace edge computing and explore solutions that expedite deployments while ensuring scalability. According to Gartner's 2023 report, "By 2027, 20% of large enterprises will have deployed an edge management and orchestration (EMO) solution, a significant increase from the less than 1% adoption rate in 2023".

"By integrating STREAMWIDE's mission-critical communications expertise with NearbyOne's cutting-edge automation platform, we empower organizations to deploy applications faster and at a fraction of the cost, unlocking a new era of efficiency and innovation.", said **Josep Martí, CEO of Nearby Computing**.

"Together, we bring to market a solution that delivers substantial cost savings. By harnessing the power of NearbyOne, we can deploy our mission-critical

communications solutions with unprecedented speed and efficiency" said **Pascal Beglin, CEO of STREAMWIDE**.

Nearby Computing and STREAMWIDE are committed to ushering in a new era of efficiency and cost-effectiveness in edge computing orchestration and automation, thereby empowering organizations to harness the full potential of this transformative technology.

About Nearby Computing

Nearby Computing helps Telcos & Enterprise customers unleash the potential of Edge Computing through Orchestration and Automation of MEC and 5G. Nearby One is an orchestration platform that goes beyond market standards to manage all tiers of the network, from Cloud and Data Centre to Edge, from a single pane of glass. Using a cross-domain approach that is fully agnostic, Nearby One manages hybrid networks at scale through domain-specific as well as comprehensive end-to-end orchestration. The solution covers all critical elements of deployment automation - from the initial Edge node provisioning to application on-boarding, to lifecycle management and LA monitoring.
The company was founded in 2018 and operates globally from its headquarters in Barcelona, Spain as global leader in Edge Orchestration.

About STREAMWIDE (Euronext Growth: ALSTW - FR0010528059)

A major player in the critical communications market for over 20 years, STREAMWIDE provides cutting-edge communications and digitization software solutions, Team on mission (mission critical) and Team on the run (business critical), tailored to address the challenges and needs of administrations and businesses.

These solutions for smartphones and PCs, offered in a SaaS model or on Premise, benefit from numerous functionalities such as the New Generation Push-to-Talk/ MCPTT over 4G LTE/5G Networks, multimedia group discussions, VoIP, collaboration tools, advanced telephony system, business process digitization and automation, field operations management, among others. These innovative solutions address the escalating demands for digital transformation and real-time coordination of interventions, empowering field teams to seamlessly convert individual efforts into collective success and operate as a unified force (ACT AS ONE) even in the most challenging professional environments.

Based in France and present in Europe, USA, Asia and Africa, STREAMWIDE is listed on Euronext Growth (Paris) - FR0010528059.Labeled "innovative company" by Bpifrance, STREAMWIDE is eligible for FCPI and PEA-PME.
