

Team on the run Small Form

Empower teams with advanced features on non-touchscreen mobile phones.

What's team on the run Small Form?

Team on the run Small Form (TOTR SF) is a customized application based on TOTR solution, tailored specifically for non-touch, small-screen mobile phones (small form factor).

Designed with convenience in mind, our application addresses the communication and coordination needs of teams across different industries.

It enables you to benefit from two main features including **Push-to-talk** and **Geolocation** services, offering a user-friendly experience on your compact screen.

Why choose TOTR SF?

In many industries, non-touch screen mobile phones remain prevalent due to their affordability, accessibility, and ease of use. Recognizing this, we've developed a customized version of the **TOTR application** tailored to meet the specific needs of organizations relying on these devices, thus helping them optimize their field operations and streamline communication across teams.

TOTR SF empowers field workers by providing them with advanced communication features that seamlessly connect them with all the team members. Our customized **TOTR SF** application offers a user-friendly experience, enabling teams to coordinate actions and communicate efficiently, regardless of the technology they use.

For which sectors?

With real-time communications and geolocation capabilities, **TOTR SF** makes a suitable solution for industries prioritizing instant and secure communication, such as:

-  Factories
-  Construction
-  Transportation and logistics
-  Hospitality and events
-  Private security

What does it offer?

TOTR SF delivers a customized and secure mobile experience.

To enable field teams to connect and coordinate effectively, our application stands out with the following key features:

- **Push-to-talk feature** for real-time communications, offering a modern walkie-talkie experience.
- **Geolocation services** to allow dispatchers to monitor field users' location in real-time, enhancing overall coordination.

Supported devices: TOTR SF is integrated and tested on Sonim devices (Sonim XP5 Plus et Sonim XP3 Plus).
